Please contact us in advance with any modifications to preferred equipment listed above. At our option AstroCreep2000 will cover the cost of repair or replacement of provided equipment in the event it is damaged out of negligent use while performing onstage. The venue will be responsible for securing and returning the equipment while not in use by AstroCreep2000 onstage or in performance.

In most cases you should be able to get this thru a simple sponsorship from a local music store. We are very good about promoting sponsors throughout the show and when that sponsor has a giveaway (cheap guitars autographed by the band do well here), they can generally recoup additional money from the sale of raffle tickets.
